The coolest thing ever invented (since corndogs)

Allows for fast, complex games with better sound, more colors and greater INTENSITY. (whew, we're out of breath)

El Controller (the controller)

Buttons, buttons everywhere! (12 vs. 8 for Sega)

LOOK, a chart!

(SNES VS. SEGA GENESIS)

	SNES	Sega	WHAT??
Colors	32,768	512	more colors mean more exciting game graphics
(on screen at 1x)	256	64-HA!	
Mode 7	yea buddy	negatory earthbird	this makes weird, groovy 3-D-ish visual effects
sprites	128	80	sprites are moving objects that make games more WHOAHHH!!!
root beers	0	0	neither has root beers
Memory	Lots	Half as much	The larger the memory, the more complex, wacky, stylin' the games can be

And beware of anyone (gee, we wonder who) trying to sell you an expensive 32-bit adapter, since we've already built more exciting technology right into our 16-bit games (check-out DKCountry + Uniracers), thus saving you tons and tons of $$dinero$$. (Please hold your applause till the end of the brochure.)

Lets you play all your Game Boy games BIG and in COLOR on your TV.

You'll need this, too
